## REFERENCES OF THE COUNTRY STATISTICS TABLES AND MAPS OF CHAPTER 7

All maps were produced by Kenya Marine and Fisheries Research Institute. Capital cities are marked with a red square, highest elevation point by a blue triangle, ports with blue circles and the location of tide gauges with a red circle.

Unless otherwise stated, the following sources were used for the statistics table located at the beginning of each country section:

- Capital city – provided by author or editors
  - Population (2005 est.)<sup>1,2</sup>
  - GDP per capita (USD 2005 est.)<sup>1,2</sup>
  - Life expectancy at birth (2005 est.)<sup>1,2</sup>
  - Land and water area<sup>3</sup>
  - Length of coastline<sup>3</sup>
  - Highest point of elevation – provided by author or editors
  - Coral reef area (2001 est.)<sup>4,5</sup>
  - Mangrove area (2005 est.)<sup>6</sup>
  - Marine protected areas (2007 est.)<sup>7</sup>
  - Capture fisheries production (2006 est.)<sup>8</sup>
  - Aquaculture fisheries production (2006 est.)<sup>80</sup>

Note that: “Total area is the sum of all land and water areas delimited by international boundaries and/or coastlines. Land area is the aggregate of all surfaces delimited by international boundaries and/or coastlines, excluding inland water bodies (lakes, reservoirs, rivers). Water area is the sum of the surfaces of all inland water bodies, such as lakes, reservoirs, or rivers, as delimited by international boundaries and/or coastlines”- World Fact Book (CIA, 2008).
